

INAUGURAL CODE CAMP IS A HIT!

Code Camp held a highly successful inaugural camp at Thomas Hassall Anglican College during the July holidays.

Code Camp held a highly successful inaugural camp at Thomas Hassall Anglican College during the July holidays. This camp saw 65 primary aged students from both Thomas Hassall and surrounding schools spend three days learning the foundations of coding. Students used the Javascript language to create fun and interactive games which they could take home to continue playing. Students loved the opportunity to learn coding skills with the help of the experienced tutors. In addition to the coding activities during the sessions, fun lunchtime activities also took place, including a silent dance party. Some of the feedback from the students included:

"This place was the best. I wish I could come here everyday. I can't believe I made my own game."

"This was the best three days of my life. I can't wait to play my game."

"It was so cool and we learnt so much. Can't wait to come back!"

The College is hoping to host more Code Camps in future. To learn more about Code Camp and to register your interest for future camps, please visit <http://codecamp.com.au/>
