CAFE CHAT SERIES: NAVIGATING GEN AI TOGETHER

In our first Cafe Chat Series for the year, we invite parents to connect with us for a relaxed conversation about topics that matter to our students, families and College community.

This session will focus on Generative Artificial Intelligence and its place in learning. Gen AI is already changing the way students search, create, think and learn. As a College, we want to help students use these tools wisely, safely and with discernment.

A staff working party has been exploring a range of Gen AI tools to identify what best suits our students and learning context. Our aim is to provide a consistent, College-endorsed tool that supports equity of access, protects student data and helps students move away from external platforms with varying privacy standards.

Most importantly, we want students to become informed navigators of AI. This means understanding what Gen AI can do, recognising its limitations and using it responsibly.

The College is working towards making an appropriate Gen AI tool available to students in Years 7–12 from early next term. Staff training and testing will continue in preparation.

Parents are invited to join us immediately after Parent Café for this Cafe Chat Series forum. It will be an opportunity to ask questions, hear more about the College’s approach and consider how we can partner together as students learn to navigate this rapidly changing space.

Date: Friday 24 July
