

THE WAY

SEALS, SNAKES & SPIDER MONKEYS

Year 10 got to spend the day at Taronga Zoo.

As a part of the Child Studies syllabus, students learn about the growth and development of children aged 0-8 years. This includes participating in activities that children would typically find themselves involved in like an excursion to the zoo.

Year 10 Child Studies students participated and involve themselves in zoo activities through the eyes of a child. They were given the task of locating different animals in various parts of the zoo and ticking them off a list, as primary aged students would with their teacher.

They engaged in a Year 3 and 4 environment workshop where they learnt about the importance of habitat and got to touch a blue tongue lizard and a very cute ring tail possum. It was a fantastic day made even better by watching Samuel the Seal putting on a very entertaining show for us.
