THE WAY

TERM 3: THURSDAY 7 SEPTEMBER 2017

COFFEE TABLE TALK

Many hours of work has been given to creating this coffee table and the results are amazing.

During the cold winter months **Katelyn Signal** would often turn up at 6.30am to work on her major project. The combination of Tasmanian Myrtle and Rock Maple timbers has given this coffee table a unique and interesting appeal to timber furniture lovers.

She combined two highly technical timber joints, half lapped mitre and a spline mitre, to create her top piece, and all by using a hand chisel and mallet. A curved front drawer face with a dovetail inlay really makes this coffee table stand out among the pigeons.

To finish her Year 12 major project design off, she used Rock Maple off-cuts to finish off each border around her table, giving a contrast of the two timbers throughout the project. Katelyn applied a Scandinavian oil finish to bring the timber to life in the final stages of the build. A big congratulations to Katelyn and her hard work ethic that pushed her through to the end.
