

THE WAY

FROM THE COLLEGE MANAGER

The construction of the new Physical Education Centre is again in full swing after a short break over the Christmas holidays.

The most significant progress is with the laying of the "Gully Gold" couch turf over the new playing field on the western side of the College. The recent extremely hot and dry conditions were not very favourable to laying turf during the holidays, hopefully we might get some rain over the next few weeks to stimulate growth and knit it all together. The sandstone logs for the project's external retaining walls are also currently being installed. This will become a significant feature to the western end of the College's central boulevard.

The Physical Education Centre building is now at the "lock-up" stage with windows, doors and external cladding in position. The main focus at present is the installation of the internal infrastructure with doors, windows and wall linings going into position.
