

THE WAY

JUNIOR SCHOOL STEM CLUB

Junior School STEM Club, which comprises students in Years 4-6, meet during lunchtime each Monday in 4D's classroom.

Over the last few weeks, we have used our Chromebooks and the program, *Scratch*, to learn some coding.

Our first challenge was to create a 'chase game', which was lots of fun! We needed to problem solve using different variables and coordinates to get our sequences 'just right', but we ended up with some great ideas and games, which were filled with colour, sound, and some interesting-looking 'sprites' (the technical name for an object which can be moved onscreen with code).

If you are interested in coming along to STEM Club, we would love to see you on Mondays. Please see Miss Donaldson if you have any questions.

Miss Claire Donaldson

Junior School Stem Coordinator
