

TOY MAKING

This term, Year 1 have been learning about the science of toys.

We have learnt about what kind of toys they had in the past, the kind of toys we have now and have dreamed of the toys we hope will be around in the future. To complete our unit on toys, students were given the opportunity to design and create a toy.

This week students put their designs to the test and created a toy of their own. The students had a great time creating and the toys look fantastic!
