

YEAR 1 AND LIFE CYCLES

Year One have been looking at life cycles this term.

We've studied butterflies, frogs, seeds and even the life cycle of a piece of popcorn! Last week, we put on our gardening hats and became farmers!

We placed some seeds in a stocking, filled it with cotton balls, tied up the stocking and gave the face some features. We're excited to see the hair(grass) grow! Some of our faces might even have nose and ear hair!

You should give it a try at home!
