

PREP BLUE NEWS

The Prep children have been exploring the concept of a spoken word.

We introduced this concept by using instruments to play along to the beat within simple pieces of music.

The children then played a variety of instruments as their friends shared words and simple sentences to describe their day at College. There were lots of smiles and giggles throughout the session! The children are now investigating how a word can be spoken, read within a story or

written. We have had fun clapping, stomping, swirling and doing silly voices as we count the words within sentences in big books.
