

THE WAY

THACTV - LIVE & FREE

We have been building THAC TV over the past year into an excellent platform that enables us to connect and communicate with our students even when they are not able to be physically with us.

As the next step to this process, we have developed an all-inclusive website that now houses our **livestreams**, and will also have a library of previous events and videos.

This new platform will be accessible to our whole College community, allowing further connection with families who may not be able to access the College site to see their child during an Assembly or Chapel.

You are now able to log on and watch live streamed events, as well as access previous events. Please go to the familiar link tv.thac.online and use the password **hassalltv** and click the link at the top of the page to the Live TV section.

As with anything new we are developing, please let us know if you have any issues so we can address them. We will continue uploading historical media from THAC TV over the coming weeks.

A special thank you to all the people that have worked behind the scenes particularly over the past year for all their efforts to advance so much in this area. We have appreciated the hard work and developments that have been made to enable us to watch and enjoy the livestreams.
