

COLLABORATING IN THE CLOUD

Teachers from the HSIE Faculty have been using Miro Board with their students during Blended Learning Online!

This is a great tool that allows students to be brainstorming and concept mapping in real-time. Each student is able to contribute to the lesson by adding thought, ideas and answers using digital sticky notes that add to a whole class effort.

The beauty of this teaching & learning strategy is that it allows the class to view each other's ideas and really establish a community of learning and knowledge around the relevant topic or learning focus. Indeed it's true, we learn better together!
