

LITERACY AND NUMERACY

Prep have been enjoying exploring letters, sounds and number over the course of the year.

To develop early literacy and numeracy skills, students are exposed to a variety of activities be it through play, creating, painting, music, movement, technology or exploration. Fine motor development is embedded throughout all Prep activities to strengthen these skills and set them up for success as they transition to Kindergarten.

Here is a snapshot of Prep Blue's Literacy and Numeracy rotations for week 3, learning about the letter 'v', patterns and teen numbers.
