

YEAR 8 GEOGRAPHY

Today year 8 presented their Term 4 final projects in a year 8 geography showcase.

Each class has been studying what makes a place liveable and their final challenge was to design and build a city that had lots of liveable features.

The students presented their work today at lunchtime and they were judged by their year advisor,

Mr Williams, and the Geography teachers. Certificates were awarded for a range of categories, such as most safe city, best designed, most environmentally friendly and all students voted on the people's choice award.
