

LOVING MATHEMATICAL LEARNING IN YEAR 4

In the past week Year 4 has been having an exciting time in Mathematics . We have been busy manipulating and investigating with two-dimensional shapes.

Students have explored:

- Combining and splitting common 2D shapes to form other common 2D shapes.
- Drawing reflections to complete symmetrical pictures and shapes, given a line of symmetry.
- Creating our own symmetrical patterns.
- Creating and recording tessellating designs by reflecting translating & rotating common shapes.
