

SCIENCE IN KINDERGARTEN

This term in Science, Kindergarten students have been learning about the movement of objects and how the way they move depends on a range of factors such as size and shape. The children have been doing experiments with classroom objects and toys to explore the push and pull forces they can use to move objects in ways such as sliding, bouncing and spinning. Students will also be collecting data and learning how to group the objects according to the way they move.

Mrs Wendy Irwin

Kindergarten Team Leader – ES1
