

SUSTAINABILITY IN YEAR 4

Over the last few weeks Year 4 have been learning about what sustainability is and the practical ways we can care of the environment. We have learnt things like reducing waste, recycling, and saving energy. Year 4 have also learned about reusing things instead of throwing them away, which is helping them for their design projects they will be completing over the next few weeks. This project will make year 4 look at rubbish in a different light, repurposing things that may have once been seen as rubbish and thrown into landfill.

By learning these things, we now have a better understanding of how our actions can help the environment and make a difference in our communities. We are becoming champions for taking care of God's creation and encouraging others to do the same.

Mr Kieran Aggett

Junior School Teacher - Year 4 Year Leader
