

## YEAR 2 SHOWCASE

**Year 2 had so much fun applying their knowledge of face proportions, sculpting some edible art.** Our Bicky Piccies showed what we have been learning about this term in our 'Face Facts' Unit. Students have been making drawings, collages and modelling, giving attention to the position and size of the facial features, such as observing the eyes halfway down the head and lining up the ears with the eyebrows and the nose. Making biscuit pictures is a joyful way to develop fine motor skills and students were challenged to even give attention to making fine eyelid skin with the fondant. Who knew art could be so yummy?
