

## CONCRETING WITH YEAR 12 CONSTRUCTION

**Year 12 VET Construction student are required to complete a practical task where they prepare for a major project.** This involves preparing the substrate, forming up and pouring a concrete slab. Students participated admirably and used all of their training so far to plan, organise and carry out a major practical task safely and successfully. Their efforts have helped to contribute to the functional college facilities and will be appreciated for years to come.

Congratulations year 12 for a successful project.
