

KINDERGARTEN MAKE SCULPTURES

This term, our Kindergarten students are diving into the world of sculpture in their art lessons! They kicked off their exploration of 3D art by honing their skills with playdough, discovering the joy of moulding and shaping.

Through a series of engaging and hands-on activities, they will further explore various materials and techniques, from creating clay pots to crafting imaginative paper sculptures. These lessons not only foster creativity but also help develop fine motor skills and an appreciation for the arts. Stay tuned for updates and photos of our little artists' masterpieces!
