COLLEGE APP UPDATE

From Tuesday 24 September, we will be updating the College App.

Once the new version is released you will find that the app will update within 72 hours if your phone settings are set to automatic app updates. If you have disabled auto updates you will need to update the app through your relevant app store.

What's Changing?

A Fresh New Look

The user interface has been updated to a newer modern design. This is largely a cosmetic change and functionality will remain the same.

Home Page

The home page has been modified slightly to enable easy access to the new notification button.

Notification Tab

A new notifications button has been added which contains all new notifications from all sources.

Notification Filter

Parents can now filter the notifications by unread only, rather than needing to scroll through notifications they have already seen.
