

THE WAY

DIGITAL LEARNING RESOURCES

Here at the College, we are committed to helping students pursue excellence through their learning.

In Senior School we use a number of online tools and platforms in order to support student learning, including:

Canvas

Our learning management system is an essential and powerful tool for students, providing access to course materials, assessment notifications, quiz and assignment results, and other key learning resources. Parents can observe this platform to stay informed about their child's studies and track their progress. Teachers regularly update their Canvas courses, ensuring students have up-to-date materials. It is also an excellent tool for catching up on missed work and for revision.

Box of Books

This platform hosts our digital textbooks, which are used in class and also serve as valuable resources for revision and practice. Many textbooks include interactive features to enhance learning and reinforce key concepts.

ClickView

A vast library of educational videos, ClickView is used in class to support learning and is also an excellent resource for students to explore outside the classroom. With videos curated to align with syllabuses, it helps deepen understanding and provides an engaging way to revise for

assessments.

Atomi (Years 11 and 12 only)

A high-quality online learning platform designed to support senior students in their studies. Atomi offers structured video lessons, quizzes, and practice questions tailored to specific subjects and syllabus requirements, making it a valuable tool for revision and exam preparation.

Education Perfect (Selected subjects only): Similar to Atomi, Education Perfect provides interactive lessons, quizzes, and practice activities for selected subjects. It helps reinforce key concepts and allows students to test their knowledge in a structured way.

If you have any questions about these platforms, please feel free to contact your child's classroom teachers or me.
