

STUDY RESOURCE FOR YEARS 11 & 12

One of the ICT resources that the College subscribes to is Atomi. It's a video-based learning website that delivers content and quizzes directly tailored to the Year 11 and 12 syllabuses.

Atomi is designed to support classroom learning by helping students revise, deepen their understanding, and build confidence in key course concepts.

In addition to Year 12, our Year 11 students now have access to this resource, with content available across a wide range of subjects, including English, Mathematics, Science, HSIE, PDHPE, and more. Each lesson breaks down syllabus points into clear, easy-to-understand videos followed by interactive quizzes that help students check their understanding immediately.

Atomi can be used for:

- - Revision before assessments
- - Homework tasks assigned by teachers to their students
- - Catching up on missed concepts
- - Strengthening understanding of difficult topics
- - Independent study and exam preparation

Students can log in using their College credentials. We encourage our Senior students to incorporate Atomi into their weekly study routines to reinforce the learning taking place in the classroom.
