

YEAR 10 STUDENTS DEVELOP IN LEADERSHIP

Student leadership is not just about taking charge - it's about building the skills, confidence and character needed to become the leaders of tomorrow.

In Term 1, our Year 10 PASS students have been presented with valuable opportunities to develop and demonstrate desirable leadership skills in authentic, real-world settings, that is the Junior School Swimming and Cross Country Carnivals.

During these events, students took on a variety of important roles that contributed to the success, including leading novelty events, timing and recording results, acting as station officials and supporting as course runners

By stepping into these responsibilities, Mr Bursey challenged the students to think on their feet, work collaboratively and engage with younger students in a supportive and encouraging manner.

As a result, we have seen significant growth in several key leadership capabilities. Students have demonstrated explicit communication skills when interacting with a range of age groups, ensuring instructions were clear and appropriate. They have been developing strong organisational skills, effectively managing time and responsibilities in a dynamic environment. In addition, many students showed increased confidence when leading groups and making decisions under pressure, as well as improved teamwork through their ability to cooperate and support one another.

These experiences highlight the importance of providing students with practical leadership opportunities that extend beyond the classroom.

As we move forward, we challenge our Year 10 PASS students to continue building on these skills, seeking out new opportunities, embracing responsibility and striving to make a positive impact within our school community. The leaders of tomorrow are already taking shape today.

Mrs Melanie Clarke

PDHPE Coordinator
