

YEAR 7 CERAMICS

As Year 7 students prepare to head into their final term of the year, they have been getting creative in Art, exploring a range of ceramic techniques.

Students have been learning how to create vessels using pinch, coil and slab building methods. After designing their own vessels on paper, they are now bringing their ideas to life as three-dimensional ceramic pots.

It has been great to see their designs take shape, with each student creating a unique piece inspired by their own ideas and designs. We look forward to seeing the finished creations.
